PERSONAL SUMMARY

Final-year Computer Science student (Semester 8) at Universitas Pancasila with dual expertise in Front-End / Web Development, Mobile Development, and UI/UX Design. Highly proficient in designing user-centered interfaces in Figma and building high-performance responsive applications using Next.js 16 (React 19), TypeScript, Tailwind CSS v4, Three.js (WebGL 3D), Flutter, Laravel, MongoDB Atlas Cloud, and Supabase. Proven track record in engineering production-grade web and mobile solutions for creative digital studios, Islamic education platforms, F&B; POS systems, e-commerce platforms, and agricultural operational systems.

EDUCATION

TEKNIK INFORMATIKA (COMPUTER SCIENCE)

September 2022 – 2026

Universitas Pancasila | GPA: 3.33 / 4.00

WORK & PROJECT EXPERIENCE

Full-Stack Web Developer & UI/UX Designer

August – September 2026

Research Developer Independent – *VeloceX (Real-Time Trading & Portfolio Tracker)*

- Architected and engineered an ultra-low latency cryptocurrency trading web platform and multi-asset portfolio tracker utilizing Next.js (App Router), React, TypeScript, Golang (Go), Docker, and Tailwind CSS.
- Engineered high-throughput backend services and real-time market data streaming via Golang & WebSockets for low-latency live price tickers, interactive candlestick chart analytics, and order book depth visualization.
- Containerized services using Docker, implemented client-side transaction simulation, automated portfolio PnL metrics calculation, and sleek institutional dark-mode UI.

Front-End / Creative Web Developer & UI/UX Designer

July – August 2026

Research Developer Independent – *LabsStdio (Creative Studio & Web Platform)*

- Designed and engineered a modern creative digital studio platform and interactive portfolio showcase utilizing Next.js 16 (App Router), React 19, TypeScript, and Tailwind CSS v4.
- Built interactive 3D WebGL particle wave and dynamic handshake dot-matrix background animations using Three.js and custom canvas shaders.
- Implemented ultra-smooth kinetic scrolling with Lenis and scroll-triggered micro-interactions using Framer Motion, including expanding video cards, service carousels, and portfolio showcases.

Lead Mobile Developer & UI/UX Designer

June – August 2026

Research Developer Independent – *MUQI (Mobile Islamic & Tahfizh Learning App)*

- Designed UI/UX user flows, interactive mobile wireframes in Figma, and complete system architecture supporting dual-portal access (Guru/Asatidz & Wali Murid).
- Developed cross-platform mobile application using Flutter (Dart) and MongoDB Atlas Cloud Database (TLS 1.3/SSL encryption) for real-time tahfizh assessment, attendance, and daily mutaba'ah tracking.
- Implemented custom Murottal audio player (speed control & duration slider), SHA-256 secure authentication, gamified achievement badges, and automated official student report card (Rapor) PDF export.

Lead Mobile Developer & UI/UX Designer

February – July 2026

Research Developer Independent – *GadoGado_App (F&B; POS & Inventory System)*

- Designed UI/UX user flows, interactive wireframes, and system architecture (UML & ERD) for an Android-based digital Point of Sale (POS) system.
- Developed cross-platform mobile app using Flutter, Cloud Firestore, and Supabase Storage featuring automatic raw material inventory deduction based on menu recipes.
- Built real-time delivery status tracking and visual sales report dashboards with PDF export capability.

Full-Stack Web Developer & UI/UX Designer

January – April 2026

Research Developer Independent – *NOXICK Studio (Custom Apparel E-Commerce Platform)*

- Designed and engineered a digital design studio & e-commerce platform (NOXICK Streetwear) using Next.js 16 (App Router), React 19, Tailwind CSS, and MySQL.
- Integrated Midtrans Payment Gateway client to process automated down payments (DP) and full transaction settlements.
- Implemented secure user authentication using JWT (JSON Web Token) & bcryptjs, along with a custom order management dashboard for admin/developers.

- Created a modern streetwear-style digital store interface in Figma and translated it into interactive, responsive web components.

Full-Stack Web Developer & System Analyst

August 2025 – January 2026

Research Developer Independent – Nyapah Banyu (Agricultural Operations Web System)

- Architected system design and engineered an integrated web application for plantation operational management using Laravel Framework, PHP, and MySQL.
- Built responsive multi-dashboard web interfaces (Owner, Field Manager, & Crop Commodity views) using Blade Templating and CSS.
- Developed comprehensive operational modules including nursery management, planting schedules, harvest tracking, logistics, HR/payroll, and real-time activity logs.
- Implemented automated report generation and data export features to streamline management decision-making.

Web Developer Internship

February – June 2025

PT Global Aspect Technology

- Designed high-fidelity UI/UX wireframes and mockups in Figma to ensure intuitive and responsive web user flows.
- Implemented web interfaces using Laravel framework, Blade Templating, and Tailwind CSS.
- Managed web hosting, application deployment on Hostinger, and MySQL database configuration.
- Compiled internal technical documentation and presented final project deliverables to the development team.

UI/UX Research & Design Intensive Bootcamp Participant

May – July 2023

MySkill.com

- Mastered and applied UX Research methodologies, Information Architecture, Wireframing, High-Fidelity Prototyping, and Design Systems in Figma.
- Built UI/UX design portfolios through real-world case studies and industry-standard design workflows.

ORGANIZATIONAL EXPERIENCE

Senat Mahasiswa (SEMA), Universitas Pancasila

Project Leader – Study Tour (STUBAN)

March 02, 2024

- Led strategic planning, agenda formulation, and cross-university execution for student exchange programs involving all SEMA board members.
- Managed inter-organizational communication and presented official accountability reports (LPJ) and evaluation summaries to the Faculty Dean and Department Heads.
- Facilitated presentation sessions, interactive Q&A; discussions, and participant feedback collection to formulate actionable recommendations for future programs.

Visual Design & Entrepreneurship Division Member

December 13, 2023 – October 03, 2024

- Produced 20+ creative visual assets (event flyers, banners, certificates, and sponsorship proposals) using Figma & Canva to enhance organizational branding.
- Managed social media content calendars and scheduled regular posts on official SEMA channels to boost student engagement and awareness.
- Collaborated on entrepreneurial strategies to design and market promotional materials for internal organization funding.

SKILLS & COMPETENCIES

- **Web & FinTech Development:** Next.js (React), TypeScript, Tailwind CSS, WebSockets (Live Streaming), Three.js (WebGL 3D), Framer Motion, Lenis Scroll, Laravel (PHP), RESTful API, JavaScript
- **Mobile Development:** Flutter, Dart, Cross-Platform App Development, Provider State Management, Audio Player & TTS Integration
- **UI/UX & Visual Design:** Figma (Trading Dashboards, Wireframing, High-Fidelity Prototyping, Design Systems), User Research, Canva, CapCut
- **Backend & Systems:** Golang (Go), Docker Containerization, MongoDB Atlas Cloud, MySQL, Cloud Firestore, Supabase, JWT Auth, SHA-256, Midtrans Gateway
- **Tools & Environment:** Antigravity IDE, Visual Studio Code, Git/GitHub, Docker, Vercel, Hostinger (Web Hosting), Draw.io, Microsoft Office
- **Soft Skills:** Organizational Leadership, System Analysis (UML/SRS), Effective Communication, Time Management, Teamwork
- **Languages:** Indonesian (Native), English (Working Proficiency / Basic)
